

YASH HARFODE

B.Tech CSE (Cybersecurity) Student • Software Engineering & Cybersecurity Enthusiast
India | yashharfode.netlify.app | github.com/yashharfode

PROFILE

B.Tech Computer Science & Engineering (Cybersecurity) student with hands-on experience building full-stack web applications, AI-enabled systems, and hackathon projects. Strong interest in software engineering, browser agents, cybersecurity, and student-focused products. Comfortable working with React/Next.js, JavaScript, Python, Firebase and modern developer tooling.

EDUCATION

B.Tech, CSE (Cybersecurity)

SATI Vidisha, Madhya Pradesh

2025–Present

CGPA: 7.87 (1st Year)

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, C/C++
Web	React, Next.js, HTML, CSS, Tailwind CSS, Vite
Backend / Data	Node.js, Firebase, Supabase, SQL/NoSQL fundamentals
Cybersecurity	Linux, Kali Linux, Burp Suite, Nmap, Amass, Web Security fundamentals
Tools	Git, GitHub, VS Code, Netlify, Vercel, Docker fundamentals

SELECTED PROJECTS

- **Scoutly — Browser Agent** — Hackathon project | Browser-agent workflow for job/application automation; working toward a real browser abstraction with mock support.
- **NivaranAI** — AI-enabled pre-consultation voice-to-SOAP healthcare system focused on converting patient conversations into structured clinical information.
- **Campify** — Student campus application built with Next.js, designed around campus utilities and student workflows.
- **Devlynix** — Student community/platform initiative covering hackathons, resources, events, opportunities and student-focused tools.

EXPERIENCE & ACTIVITIES

- Built and iterated on multiple full-stack projects using modern JavaScript frameworks and cloud platforms.
- Participated in hackathon-oriented development with a focus on AI agents and practical automation.
- Exploring cybersecurity through web security, Linux, reconnaissance and application-security tooling.
- Interested in organizing student technology initiatives and building communities around development and cybersecurity.

ACHIEVEMENTS / HIGHLIGHTS

- 1st-year B.Tech CGPA: 7.87
- Portfolio includes full-stack, AI and student-product projects
- B.Tech specialization: Computer Science & Engineering (Cybersecurity)

CAREER INTERESTS

Software Engineering • Full-Stack Development • AI Agents • Cybersecurity • Application Security • Developer Tools • Hackathons & Product Building
